DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

44 CFR Part 67

Docket ID FEMA-2010-0003

[Internal Agency Docket No. FEMA-B-1089]

Proposed Flood Elevation Determinations

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Proposed rule; correction.

SUMMARY: On May 25, 2010, FEMA published in the Federal Register a proposed rule that contained an erroneous table. This notice provides corrections to that table, to be used in lieu of the information published at 75 FR 29219. The table provided here represents the flooding sources, location of referenced elevations, effective and modified elevations, and communities affected for Scott County, Kentucky, and Incorporated Areas. Specifically, it addresses the following flooding sources: Dry Run, Dry Run Tributary 1 (backwater effects from Dry Run), Hall Branch (backwater effects from Eagle Creek), Lane Run, McCracken Creek (backwater effects from North Elkhorn Creek), Royal Springs Creek (backwater effects from North Elkhorn Creek), South Elkhorn Creek, Spoon Branch (backwater effects from Eagle Creek), and Town Branch (backwater effects from South Elkhorn Creek).

DATES: Comments are to be submitted on or before [INSERT DATE 90 DAYS AFTER DATE OF PUBLICATION IN THE FEDERAL REGISTER].

ADDRESSES: You may submit comments, identified by Docket No. FEMA-B-1089, to Luis Rodriguez, Chief, Engineering Management Branch, Federal Insurance and Mitigation Administration, Federal Emergency Management Agency, 500 C Street SW., Washington, DC 20472, (202) 646-4064 or (e-mail) Luis.Rodriguez3@fema.dhs.gov.

FOR FURTHER INFORMATION CONTACT: Luis Rodriguez, Chief, Engineering Management Branch, Federal Insurance and Mitigation Administration, Federal Emergency Management Agency, 500 C Street SW., Washington, DC 20472, (202) 646-4064 or (e-mail) Luis.Rodriguez3@fema.dhs.gov.

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency (FEMA) publishes proposed determinations of Base (1% annual-chance) Flood Elevations (BFEs) and modified BFEs for communities participating in the National Flood Insurance Program (NFIP), in accordance with section 110 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4104, and 44 CFR 67.4(a).

These proposed BFEs and modified BFEs, together with the floodplain management criteria required by 44 CFR 60.3, are minimum requirements. They should not be construed to mean that the community must change any existing ordinances that are more stringent in their floodplain management requirements. The community may at any time enact stricter requirements of its own or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations are used to meet the floodplain management requirements of the NFIP and also are used to calculate the appropriate flood insurance premium rates for new buildings built after these elevations are made final, and for the contents in those buildings.

Corrections

In the proposed rule published at 75 FR 29219, in the May 25, 2010, issue of the Federal Register, FEMA published a table under the authority of 44 CFR 67.4. The table, entitled “Scott County, Kentucky, and Incorporated Areas” addressed the following flooding sources: Dry Run, Dry Run Tributary 1 (backwater effects from Dry Run), Hall Branch (backwater effects from Eagle Creek), Lane Run, McCracken Creek (backwater effects from North Elkhorn Creek), Royal Springs Creek (backwater effects from North Elkhorn Creek), South Elkhorn Creek, Spoon Branch (backwater effects from Eagle Creek), and Town Branch (backwater effects from South Elkhorn Creek). That table contained inaccurate information as to the affected communities for the flooding source Spoon Branch (backwater effects from Eagle Creek). In this notice, FEMA is publishing a table containing the accurate information, to address these prior errors. The information provided below should be used in lieu of that previously published.

Scott County, Kentucky, and Incorporated Areas				
Flooding Source(s)	Location of Referenced Elevation	*Elevation in feet (NGVD) +Elevation in feet (NAVD) #Depth in feet above ground ^Elevation in meters (MSL)		Communities Affected
		Effective	Modified	
Dry Run	Approximately 0.5 mile upstream of the North Elkhorn Creek confluence	+800	+801	City of Georgetown, Unincorporated Areas of Scott County
	Approximately 1.2 miles upstream of Burton Pike	None	+880	
Dry Run Tributary 1 (backwater effects from Dry Run)	From the Dry Run confluence to approximately 0.3 mile downstream of I-75	None	+828	Unincorporated Areas of Scott County
Hall Branch (backwater effects from Eagle Creek)	From the Eagle Creek confluence to approximately 0.3 mile upstream of Hinton-Sadieville Road	None	+780	Unincorporated Areas of Scott County
Lane Run	At the North Elkhorn Creek confluence	+812	+811	City of Georgetown, Unincorporated Areas of Scott County
	Approximately 850 feet upstream of Delaplain Road	None	+889	
McCracken Creek	From the North Elkhorn Creek	None	+782	City of Georgetown,

(backwater effects from North Elkhorn Creek)	confluence to approximately 269 feet downstream of the McCracken Creek Tributary 2 confluence			Unincorporated Areas of Scott County
Royal Springs Creek (backwater effects from North Elkhorn Creek)	From the North Elkhorn Creek confluence to approximately 0.4 mile upstream of Paddler Lane	None	+798	City of Georgetown, Unincorporated Areas of Scott County
South Elkhorn Creek	Just downstream of South Weisenberger Mill Road	None	+813	Unincorporated Areas of Scott County
Spoon Branch	At the Town Branch confluence	None	+816	
(backwater effects from Eagle Creek)	From the Eagle Creek confluence to approximately 783 feet upstream of Sadieville Road	None	+778	City of Sadieville, Unincorporated Areas of Scott County
Town Branch (backwater effects from South Elkhorn Creek)	From the South Elkhorn Creek confluence to approximately 0.4 mile upstream of the South Elkhorn Creek confluence	None	+816	Unincorporated Areas of Scott County

*National Geodetic Vertical Datum.

+North American Vertical Datum.

#Depth in feet above ground.

^Mean Sea Level, rounded to the nearest 0.1 meter.

** BFEs to be changed include the listed downstream and upstream BFEs, and include BFEs located on the stream reach between the referenced locations above. Please refer to the revised Flood Insurance Rate Map located at the community map repository (see below) for exact locations of all BFEs to be changed.

Send comments to Luis Rodriguez, Chief, Engineering Management Branch, Federal Insurance and Mitigation Administration, Federal Emergency Management Agency, 500 C Street SW., Washington, DC 20472.
